Dislocation of the Hip: A Review of Types, Causes, and ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6162140>

A 2005 study of more than 20,000 total hip replacements found a significantly decreased rate of dislocation with the use of larger femoral heads. 30 Stratified by femoral head size, dislocation rates were 3.6% for 28 mm, 4.8% for 26 mm, and 18.8% for 22 mm. 8 Other studies have noted the effectiveness of even larger head sizes ranging from 28 to 40 mm. 31,32 Types of prosthetics include ...

<https://link.springer.com/article/10.1007/s00402-020-03666-2> ▾

Oct 28, 2020 · Femoral head fractures considered to be rare injuries. Surgical intervention is indicated for major fragment displacement or in the presence of instability. Surgical management can be achieved through either Anterior, posterior, and trans-trochanteric surgical approaches. Surgical hip dislocation (SHD) has been advocated by many authors to be a safe and effective alternative way of management.

Safety and efficacy of surgical hip dislocation in managing femoral head fractures: A
systematic review and meta-analysis

Khalifa AA *et al.* SHD for FHF, systematic review

Ahmed A Khalifa, Mohamed A Haridy, Ali Fergany

Abstract

BACKGROUND

Femoral head fractures (FHF) are considered relatively uncommon injuries;
however, open reduction and internal fixation (ORIF) are preferred for most displaced
