SPECIFIC COMMENTS TO AUTHORS

In the method you talk about evaluation of fibrosis using a non-invasive assessment: please provide more details. Among 51 patients includes, we analyzed 33 patients for the HSD17B13 genotype. Why did you not analysed the others ? I suggest you take more details.

SPECIFIC COMMENTS TO AUTHORS

The manuscript was well written, the authors used important references and approximately 1/3 of them are less than 5 years old. Only a typo persists. In the first paragraph of the Ethical statements: instead of 'manuscript came form a research ...' I think the authors wanted to say: manuscript came FROM a research ...'.
