#### **SPECIFIC COMMENTS TO AUTHORS**

My comments are 1. Gestational anemia in China is associated with geographical distribution, premature birth, and PROM. The substantial explanation regarding this conclusion should be added in the discussion. 2. This was a case control study, the choosing of control always be the difficult part. Could the author add on the methods to confirm the reader that the controlled was matched not make a selection bias.

#### **SPECIFIC COMMENTS TO AUTHORS**

The study presents high quality and deals with important clinical issue, such type of study is needed. I have only few small remarks that authors should address properly. I recommend to accept the manuscript after minor revision. There are only some points to correct: - please provide the list of abbreviations - please provide the number of ethical approval - introduction and discussion section need improvement; please provide information on how your results will translate into clinical practice - in discussion section please provide study strong points and study limitation section - please correct typos All abovementioned issues are crucial for the credibility of the results. The paper can be accepted only after addressing all the issues and another subsequent review. I recommend to accept the manuscript after minor revision.
