Heyde's syndrome: A critical review of the literature

<https://pubmed.ncbi.nlm.nih.gov/21863647>

Heyde's syndrome is an uncommon association between aortic stenosis and gastrointestinal bleeding. Although initially described during the late 1950s, with subsequent reports of a possible link between these disorders, controversy persists regarding the incidence, pathogenesis, and treatment of this syndrome.

Heyde Syndrome: Aortic Stenosis and Beyond

<https://pubmed.ncbi.nlm.nih.gov/31230737>

Heyde described aortic stenosis and gastrointestinal bleeding in the 1950s. Since then, a link with intestinal angiodysplasia and abnormalities of von Willebrand factor (VWF) has been noted. Loss of the highest-molecular-weight multimers of VWF and bleeding also have been described in subaortic sten ...
