

Dear Authors, Although the topic of the paper is good to explore, your manuscript needs a minor modification as per recommendation provided below: 1. Please consider numbering the lines in the paper, to allow the reviewer to make comments and easily refer to parts of the manuscript. 2. The section on Brain glucose metabolism in Alzheimer's disease is a little weak. please update the references.

Answer to the reviewers:

According to the suggestions of the referees, the answers are:

Referee 1 1. I can no longer consider the numbering of the lines in the article (he also mentions it)

2. Annex references to the section on mitochondria (Numbers from 88 to 96)
Referee 2 mention that it is published as is...

It is an interesting manuscript. Authors succeed to present their data in a clear way adding information to the existing literature. Therefore, I have no corrections to do and the manuscript can be published unaltered.
