#### **SPECIFIC COMMENTS TO AUTHORS**

This is an interesting and meaningful study. In this paper, 6 cases of primary lung intestinal adenocarcinoma were analyzed, and the diagnosis, treatment and related literature were reviewed. However, there still exist the following problems that need to be revised. 1. Please organize the information about the six cases into a timeline. 2. In the "introduction" part on page 4, there is a grammatical error which has been highlighted in yellow. This sentence lacks verb. 3. On page 6, it's better to move the section marked in yellow to the discussion part.
