

## Editorial Office's Comments

**(1) Science editor:** 1 Scientific quality: The topic is within the scope of the World Journal of Diabetes. (1) Classification: Grade B and Grade B; (2) Summary of the Peer-Review Report: The review is in general terms well written. (3) Format: None; (4) References: None; (5) Self-cited references: None; (6) References recommendations: None. 2 Language evaluation: Classification: Grade B. 3 Academic norms and rules: The authors declare no conflicts of interest. No academic misconduct was found by the Google/Bing search. 4 Supplementary comments: None; 5 Issues raised: None; 6 Re-Review: Not required. 7 Recommendation: Conditional acceptance after minor revision.

**(2) Company editor-in-chief:** I have reviewed the Peer-Review Report, the full text of the manuscript, and the relevant ethics documents, all of which have met the basic publishing requirements of the World Journal of Diabetes, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s) for its revision according to the Peer-Review Report, Editorial Office's comments and the Criteria for Manuscript Revision by Authors. However, the quality of the English language of the manuscript does not meet the requirements of the journal. Before final acceptance, the author(s) must provide the English Language Certificate issued by a professional English language editing company. Please visit the following website for the professional English language editing companies we recommend: <https://www.wjgnet.com/bpg/gerinfo/240>.

**Response:** *We thank the editors for this decision and for giving us the opportunity to respond to the reviewer's comments. We also thank the reviewers for their time and comments. We have carefully revised the manuscript according to the suggestions and provided response to the reviewer below.*

## Reviewer Comments

**Reviewer #1:**

**Scientific Quality:** Grade B (Very good)

**Language Quality:** Grade B (Minor language polishing)

**Conclusion:** Accept (General priority)

**Specific Comments to Authors:** Authors discussed an interesting topic about the effects of FGM system on glycemic control (A1c) among type 1 diabetes (T1D) patients. The manuscript has delivered important clinical message and should be of great interest to the readers. Although needs extensive language corrections before being published, this article could have been improved by minor revisions.

**Response:** *We thank the Reviewer for this positive feedback. The manuscript has now been edited accordingly as per his/her suggestion. The manuscript has undergone a comprehensive editing service, and the edit has achieved Grade A: priority publishing. An English Language Certificate; issued by a professional English language editing company, was provided and uploaded. We hope that the quality of the English language of the manuscript now meet the requirements of the journal.*
