

**Re: 68778 World Journal of Gastroenterology**

**Dear Editors and reviewers,**

We thank the editorial board for the comments about our manuscript (68778) entitled “Elimination of viral hepatitis in children after liver transplants”. The manuscript has been thoroughly revised according to the reviewer’s and editor’s comments. We look forward to hearing your positive response to this revised manuscript. Below are the answers to the reviewer’s and editor’s comments.

**Response to Reviewer 1**

**Comments:** 1-I think the title should be more impressive to reflect the subject. 2- Quality of manuscript organization and presentation is in need for more improvement

**Answer:**

We sincerely appreciate the reviewer’s comments. We changed the title of this manuscript to “Eliminating viral hepatitis in children after liver transplant: how to reach the goal by 2030”. For the quality of the manuscript organization and presentation, we added more important data, reorganized the content in the manuscript and edited the figures to make it clearer and more informative.

**Response to Scientific editor:**

Issue raised: The authors did not provide original pictures. Please provide the original figure files. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor

**Answer:**

Thank you very much indeed for editor's comment. We provided the original figures in PowerPoint and all figures could be editable.

**Response to Company editor-in-chief:**

Issue raised: the quality of the English language of the manuscript does not meet the requirements of the journal. Before final acceptance, the author(s) must provide the English Language Certificate issued by a professional English language editing company. Please visit the following website for the professional English language editing companies we recommend: <https://www.wjgnet.com/bpg/gerinfo/240>.

**Answer:**

We sincerely appreciate the editor's helpful comments. We sent our revised manuscript to Springer Nature Author Services Company for English polishing. The new English Language Certificate was provided for consideration as well.

Once again, thank you very much for your comments and suggestions.

Sincerely yours,

Yong Poovorawan, MD, Professor
