Annual Progress Reports

The following is an excerpt from the minutes of the Executive Subcommittee of the Institutional Animal Care and Use Committee dated January 18, 2012:

Dr. Nicole R. Murray--A48510--[Florida](#)

A designated member of the IACUC reviewed and approved an annual progress report from Dr. N. Murray for the protocol entitled "Role of PKC iota in metaplasia and initiation of pancreatic cancer". Dr. Murray requests that this protocol remain active and indicates that the methods are unchanged from those originally approved. A total of 828 of 1981 approved mice have been used to date. A48510
