

We would firstly like to thank the reviewers and editors for considering and donating time and efforts to our manuscript entitled "Acute upper gastrointestinal bleeding caused by esophageal right bronchial artery fistula: A case report." (Manuscript NO: 69038).

Our point-by-point responses to each of the issues raised in the peer-review report are presented below.

English language of the revised manuscript has been polished and a new language editing certificate has been provided.

We hope that the revisions in the manuscript and our accompanying responses will be sufficient to make our manuscript suitable for publication in Woorld Journal of Gastrointestinal Endoscopy.

We shall look forward to hearing from you at your earliest convenience.

Best regards,

Alberto Martino, MD

Gastroenterology and Digestive Endoscopy

AORN "A. Cardarelli", Napoli, Italy

**To Reviewer #1:**

1. I think follow-up work is very important. The authors need to closely follow the patient's prognosis for rebleeding or other complications.

**Response: We are very thankful for your comment. Follow-up has been added in the Outcome and follow-up section as follows: "The patient died at home one month post-operatively, in the absence of overt GI rebleeding or anemization".**

2. In addition, some references should be supplemented and updated.

**Response: We are very thankful for your comment. References have been supplemented and updated (please see reference n. 6-8 and 14-16) ".**

**To Editorial Office:**

**Many thanks for considering our manuscript.**
