## SPECIFIC COMMENTS TO AUTHORS

1 Title. Is this article a retrospective study? Or a survey? I would like you to change the title name e.g. A comparison of the impact of ERCP between pre-COVID-19 and current COVID-19 outbreaks in South Korea- retrospective survey. 2 Abstract reflects the work described in the manuscript? 3 Key words are OK. 4 Background. This manuscript adequately describe the background, present status and significance of the study. 5 Methods. In "COVID-19 quarantine and protective equipment", you described the detail of PPE and procedures under COVID-19 pandemic, however, we didn't know about the PPE before pandemic. You surveyed the pre-pandemic and under pandemic situations of ERCP, you should describe the differences of PPE, the flowchart before ERCP in the era of pre-pamdemic. 6 Results. Are the research objectives achieved by the experiments used in this study? What are the contributions that the study has made for research progress in this field? 7 Discussion. You should consider in detail why the number of ERCP cases was low in 2018 and why the number of cases increased in 2019. Also, as you know, a reduction in emergency ERCP can be a critical event, and the consequences can be fatal. Shouldn't the emergency ERCP be reduced while maintaining PPE and barrier procedures against aerosols? (Regular ERCP can be reduced) 8 Illustrations and tables. In figure1, you should connect them with a dot line so that you can easily see the transition of the number of cases. 9 Biostatistics. OK 10 Units. OK 11 References. Excellent. 12 Quality of manuscript organization and presentation. This manuscript well, concisely and coherently organized and presented. Language and grammar was appropriate. 13 Research methods and reporting. OK 14 Ethics statements. OK
