#### **SPECIFIC COMMENTS TO AUTHORS**

The present manuscript describes a rare case of spinal hydatidosis with history of surgery due to the previous cystic echinococcosis. The abstract needs to include the misdiagnosis of the CE with spinal tuberculosis. Has the patient received albendazole before the surgery? The parasite names must be italics. For example: Page 3, line 22. If the ELISA test was conducted for *Echinococcus granulosus*, please mention it. The discussion section is long, please rewrite it. The manuscript requires professional editing to bring it to an acceptable level of English language quality.
