|   | Company Editor-in-Chief: I have reviewed the Peer-Review                |     |
|   | Report, the full text of the manuscript, and the relevant ethics        |     |
|   | documents, all of which have met the basic publishing requirements      |     |
|   | of the World Journal of Clinical Cases, and the manuscript is           |     |
|   | conditionally accepted. I have sent the manuscript to the author(s)     |     |
|   | for its revision according to the Peer-Review Report, Editorial         |     |
|   | Office's comments and the Criteria for Manuscript Revision by           |     |
|   | Authors. Before its final acceptance, the author(s) must provide the    |     |
|   | Signed Informed Consent Form(s) or Document(s) of treatment in          |     |
|   | Chinese. Please provide the original figure documents. Please           |     |

| 8  | support and includes the corresponding identification number(s)         | [Y] |
|    | and program ID(s) if available, and contains no spelling errors.        |     |
|    | The 'Corresponding author' passage provides the corresponding           |     |
|    | author's full first and family (sur)names, abbreviated title (e.g., MD, |     |
| 9  | PhD), affiliated institute's name and complete postal address           | [Y] |
|    | (including zip code) and e-mail (written in all lowercase), and         |     |
|    | contains no spelling errors.  |     |
|    | The Manuscript Tracking information (i.e., Received, Peer review        |     |
| 10 | started, First decision, Revised, Accepted, Article in press, and       | [V] |
| 10 | Published online) are provided along with the corresponding editor      | [Y] |
|    | and date for each item, and contain no spelling errors.                 |     |
|    | The Abstract section is formatted according to the article-specific     |     |

|    | The 'INTRODUCTION' section clearly describes the relevant                                   |       |
|----|---|-------|
|    | background information for the study. Only the most relevant and                            |       |
|    | current (within the past 5 years) literature is cited, with the                             |       |
|    | exception of rare instances of seminal literature citations. All                            |       |
|    | technical terms and/or abbreviations are explained and/or defined,                          |       |
| 45 | with the full name of abbreviations given upon first appearance in                          | D. C. |
| 15 | the text and the abbreviation presented in parentheses [i.e.,                               | [Y]   |
|    | "computed tomography (CT)"]. First-person pronouns (e.g., 'I',                              |       |
|    | 'we') are used appropriately to clearly indicate the work performed                         |       |
|    | by the author(s). When weaknesses of previous studies are                                   |       |
|    | described in the text to highlight the innovations related to the                           |       |
|    | current study, the information is presented carefully.                                      |       |
|    | The 'MATERIALS AND METHODS' section clearly and accurately                                  |       |
|    | describes all materials and methods used to obtain the data                                 |       |
| 16 | presented in the article and is adequate for a reader to repeat the                         | [N]   |
|    | study.  |       |
|    | The 'RESULTS' section concisely describes the observational and                             |       |
|    | ·   |       |
|    | experimental results. Representative data and data that have                                |       |
| 17 | scientific significance are emphasized. Data is presented in either                         | D. T. |
|    | the text, a table or figure (i.e., chart, diagram, graph or image), but is                  | [N]   |
|    | not repeated among each. Information presented in the tables and                            |       |
|    | figures clearly describes the trends, meaning, and inferences.                              |       |
|    | Results described in textual form are accurate, concise and clear.                          |       |
|    | Statistical symbols are accurate. Statistical significance is expressed                     |       |
|    | as ${}^{a}P$ < 0.05, ${}^{b}P$ < 0.01 ( $P$ > 0.05 usually does not need to be denoted).    |       |
| 18 | If there are other series of $P$ values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used,        | [N]   |
|    | and a third series of $P$ values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01. |       |
|    | Statistical data is expressed as mean $\pm$ SD or mean $\pm$ SE.                            |       |

|                                       | The 'REFERENCES' section lists the references in the Vancouver  |     |
|                                       | style. This style uses Arabic numeral in-text citations based on the  |     |
|                                       | order of the first appearance of a source in the text. For citations  |     |
| 22                                    | where the author's name is indicated in the text, a superscript   | [Y] |
|                                       | number should be placed following the name (i.e, "Pang et al"). For   |     |
|                                       | citations where no author is indicated, a superscript number should   |     |
|                                       | be placed at the end of the sentence. Respective examples are: "Ma <sup>[1]</sup>   |     |
|                                       | reported", "Pan et al <sup>[2-5]</sup> indicated"; "PCR has a high  |     |
|                                       | sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the  |     |
|                                       | reference number is described in the text; for example, "The  |     |
|                                       | experimental method used has been described in reference [8]." The  |     |
|                                       | style of reference citations in tables is the same as that in the text  |     |
|                                       | (e.g., Pan et al <sup>[2-5]</sup> , please see reference [8]).  |     |
