| 15 | The 'INTRODUCTION' section clearly describes the relevant<br>background information for the study. Only the most relevant and<br>current (within the past 5 years) literature is cited, with the<br>exception of rare instances of seminal literature citations. All<br>technical terms and/or abbreviations are explained and/or defined,<br>with the full name of abbreviations given upon first appearance in<br>the text and the abbreviation presented in parentheses [ <i>i.e.</i> ,                | [Y] |
|----|---|-----|
|    | "computed tomography (CT)"]. First-person pronouns ( <i>e.g.</i> , 'T', 'we') are used appropriately to clearly indicate the work performed by the author(s). When weaknesses of previous studies are described in the text to highlight the innovations related to the current study, the information is presented carefully.  |     |
| 16 | The 'MATERIALS AND METHODS' section clearly and accurately<br>describes all materials and methods used to obtain the data<br>presented in the article and is adequate for a reader to repeat the<br>study.  | [N] |
| 17 | The 'RESULTS' section concisely describes the observational and<br>experimental results. Representative data and data that have<br>scientific significance are emphasized. Data is presented in either<br>the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is<br>not repeated among each. Information presented in the tables and<br>figures clearly describes the trends, meaning, and inferences.<br>Results described in textual form are accurate, concise and clear. | [N] |
| 18 | Statistical symbols are accurate. Statistical significance is expressed<br>as ${}^{a}P < 0.05$ , ${}^{b}P < 0.01$ ( $P > 0.05$ usually does not need to be denoted).<br>If there are other series of $P$ values, ${}^{c}P < 0.05$ and ${}^{d}P < 0.01$ are used,<br>and a third series of $P$ values is expressed as ${}^{e}P < 0.05$ and ${}^{t}P < 0.01$ .<br>Statistical data is expressed as mean ± SD or mean ± SE.  | [N] |

|    | The 'DISCUSSION' section (1) describes the main purpose and<br>hypothesis of the study; (2) summarizes the most important results;<br>(3) illustrates and explains the results (but does not simply repeat  |     |
|----|---|-----|
| 19 | the data) and draws conclusions or inferences based on the results;<br>(4) points out the limitations of the study and their impact on the<br>results, as well as proposes further advice on future research  | [Y] |
|    | topic(s) or direction(s); and (5) describes the theoretical significance<br>and practical value of the findings.  |     |
| 20 | The 'ACKNOWLEDGEMENTS' section expresses gratitude to any<br>individuals or organizations for technical support ( <i>i.e.</i> , providing<br>instrumentation, equipment or experimental materials, and/or<br>assistance in experimental work), non-technical services ( <i>i.e.</i> , useful<br>inspiration, suggestions, guidance, or review), and/or any other<br>auxiliary work.   | [N] |
| 21 | The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format.   | [N] |
| 22 | The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript number should be placed following the name ( <i>i.e</i> , "Pang <i>et al</i> "). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Ma <sup>[1]</sup> reported", "Pan <i>et al</i> <sup>[2-5]</sup> indicated"; "PCR has a high sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the reference number is described in the text; for example, "The style of reference citations in tables is the same as that in the text ( <i>e.g.</i> , Pan <i>et al</i> <sup>[2-5]</sup> , please see reference [8]). | [Y] |
