	General Information of the Manuscript	
	Name of journal: World Journal of Clinical Cases	
	Manuscript NO.: 71529	
	Column: Case Report	
	Title: Aseptic abscess in the abdominal wall accompanied by	
1	monoclonal gammopathy simulating the local recurrence of rectal	
	cancer: A case report	[Y]
	Authors: Yan Yu, Yongdong Feng, Chao Zhang, Ran Li, Dean Tian and	
	Huanjun huang	
	Reviewer code: 03262127, and 02823583	
	First decision: 2021-12-02 07:13	
	Scientific Editor: Jia-Ru Fan	

Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

	Date of signature: <u>December/27/ 2021</u> (month/day/year)

Figure 1 title, A:; B: etc.

Company Editor-in-Chief: I have reviewed the Peer-Review Report, full text of the manuscript, and the relevant ethics documents, all of which have met the basic publishing requirements of the World Journal of Clinical Cases, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s) for its revision according to the Peer-Review Report, Editorial Office's comments and the Criteria for Manuscript Revision by Authors. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor.

Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is not too	
	long (no more than 18 words). Words such as 'exploration', 'research',	
4	'analysis', 'observation', and 'investigation' are avoided. The title does	[Y]
	not start with 'The' and does not include any Arabic numbers or	
	uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
	The authors' full family (sur)names and full/abbreviated first names are	
6	listed on the title page and are consistent with those listed in the signed	[Y]
	BPG Copyright License Agreement form.	
	The 'Author contributions' passage describes the specific contribution(s)	
	made by each author. The author's names are listed in the following	
	format: full family (sur)name followed by abbreviated first and middles	
	names.	
	e.g., "Wang CL and Liang L contributed equally to this work; Wang CL,	
7	Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the research	[Y]
	study; Wang CL, Zou CC, Hong F and Wu XM performed the research;	
	Xue JZ and Lu JR contributed new reagents and analytic tools; Wang	
	CL, Liang L and Fu JF analyzed the data; and Wang CL, Liang L and Fu	
	JF wrote the manuscript. All authors have read and approve the final	
	manuscript."	
	The 'Supported by' statement describes the source(s) of financial	
8	support and includes the corresponding identification number(s) and	[N]
	program ID(s) if available, and contains no spelling errors.	
	The 'Corresponding author' passage provides the corresponding	
	author's full first and family (sur)names, abbreviated title (e.g., MD,	
9	PhD), affiliated institute's name and complete postal address (including	[Y]
	zip code) and e-mail (written in all lowercase), and contains no spelling	
	errors.	

Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

10	The Manuscript Tracking information (i.e., Received, Peer review started, First decision, Revised, Accepted, Article in press, and	[Y]
	Published online) are provided along with the corresponding editor and	1-1
	date for each item, and contain no spelling errors.	
	The Abstract section is formatted according to the article-specific style	
	(structured vs unstructured) and word count thresholds, as follows:	
	Commentary, Frontier, Diagnostic Advances, Medical Ethics,	
	Minireview, Review, Therapeutics Advances, and Topic Highlight:	
11	Non-structured abstract that is no less than 200 words.	D.O.
11	Field of Vision, Case Report and Letter to the Editor: Non-structured	[Y]
	abstract that is no less than 150 words.	
	Research articles: Structured abstract with subsections for AIM (no more	
	than 20 words); METHODS (no less than 80 words); RESULTS (no less	
	than 120 words); and CONCLUSION (no more than 26 words).	
	The 'Key words' list provides 5-10 keywords that reflect the main	
12	content of the study. The first letter of each keyword is capitalized, and	[Y]
	each keyword is separated by a semicolon.	
	The "citation" contains authors' names and manuscript title. The name	
	of the first author should be typed in bold letters; the family (sur) name	
	of all authors should be typed with the first letter capitalized, followed	
10	by their abbreviated first and middle initials. For example, an article by	
13	Jae Moon Yoon, Ki Young Son, Chun Sick Eom, Daniel Durrance, Sang	[Y]
	Min Park will be written as Yoon JM, Son KY, Eom CS, Durrance D,	
	Park SM. Pre-existing diabetes mellitus increases the risk of gastric	
	cancer: A meta-analysis. World J Gastroenterol 2019; In press	
	The 'Core tip' provides a summary (less than 100 words) of the study	
14	that outlines the most innovative and important arguments and core	[Y]
	contents of the paper and will serve to effectively attract readers.	

Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

	The 'INTRODUCTION' section closuly describes the relevant	
	The 'INTRODUCTION' section clearly describes the relevant	
	background information for the study. Only the most relevant and	
	current (within the past 5 years) literature is cited, with the exception of	
	rare instances of seminal literature citations. All technical terms and/or	
	abbreviations are explained and/or defined, with the full name of	
15	abbreviations given upon first appearance in the text and the	[Y]
	abbreviation presented in parentheses [i.e., "computed tomography	
	(CT)"]. First-person pronouns (e.g., 'I', 'we') are used appropriately to	
	clearly indicate the work performed by the author(s). When weaknesses	
	of previous studies are described in the text to highlight the innovations	
	related to the current study, the information is presented carefully.	
	The 'MATERIALS AND METHODS' section clearly and accurately	
16	describes all materials and methods used to obtain the data presented in	[N]
	the article and is adequate for a reader to repeat the study.	
	The 'RESULTS' section concisely describes the observational and	
	experimental results. Representative data and data that have scientific	
	significance are emphasized. Data is presented in either the text, a table	
17	or figure (i.e., chart, diagram, graph or image), but is not repeated	[N]
	among each. Information presented in the tables and figures clearly	
	describes the trends, meaning, and inferences. Results described in	
	textual form are accurate, concise and clear.	
	Statistical symbols are accurate. Statistical significance is expressed as ^a <i>P</i>	
	< 0.05 , ${}^{\rm b}P < 0.01$ ($P > 0.05$ usually does not need to be denoted). If there	
18	are other series of P values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used, and a third	[N]
	series of P values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01. Statistical data	
	is expressed as mean ± SD or mean ± SE.	

Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

19	The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.	[Y]
20	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (<i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (<i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.	[N]
21	The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format.	[N]
22	The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript number should be placed following the name (<i>i.e.</i> ., "Pang <i>et al</i> "). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Ma ^[1] reported", "Pan <i>et al</i> ^[2-5] indicated"; "PCR has a high sensitivity ^[6,9] ." No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text (<i>e.g.</i> , Pan <i>et al</i> ^[2-5] , please see reference [8]).	[Y]

Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

Journal references have been verified to ensure that there are no duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of journals in other languages are listed according to indexing information retrieved from Google. Book references are presented with all the information relevant to the electronic version. The number of cited references is appropriate for the article type, as follows: Commentary; no less than 50; Review; no less than 100; Article; no less than 30/26; Case Report and Letter to the Editor; no less than 1. The ethics-related statements are provided in accordance with the manuscript type (e.g., Manuscript NoInstitutional review board statement, Manuscript NoAnimal care and use statement, etc.). The names of the peer reviewers and the scientific editor are present at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang JL). The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text. Symbols in tables (e.g., +, -, ×, *, *, *) correctly correspond to the definitions in the footnotes. Only one legend is provided for each multi-panel figure consisting of color graphs, black and white graphs, or line graphs that depicts data of the same theme. For example: Figure 1 Pathological changes in atrophic gastritis tissue before and after treatment. A:; B:; C:; D:; E:; F: Split pictures include flow charts, line graphs, histograms, and graphs including text. Unsplit pictures include meta-analysis diagrams, PCR amplification curves, and survival curves.		,

36	This document (Checklist of Responsibilities for Scientific Editors) has been saved under the file name: manuscript NoScientific editor work list (<i>e.g.</i> , 870-Scientific editor work list).	[Y]
37	A <i>CrossCheck</i> investigation (an effective tool for detecting unoriginal content, enabling our editors to preserve the journal's integrity and the authors' copyright) has been performed for the manuscript <i>via</i> the website: http://www.ithenticate.com/. The results document contains the following information for the manuscript: "Name of journal", "Manuscript No.", "Columns", "Title" and "Author list". The Figure of the <i>CrossCheck</i> results is saved in JPEG format (.jpg) at 1440 × 680 pixel resolution. The PDF of the <i>CrossCheck</i> results has been saved under the file name: manuscript No CrossCheck report (<i>e.g.</i> , 870-CrossCheck report). The Google searches have also been performed to further ensure publication of original content.	[Y]
38	The text of the manuscript is typed in Book Antiqua font, 12 pt, with 1.5 line spacing.	
Responsibilit ies of scientific editors	The primary responsibilities of our scientific editors include carefully checking the entire manuscript and all accompanying materials for: (1) errors in spelling, grammar, punctuation and wording; (2) suitability of tables, figures, figure data and legends; (3) accurate and appropriate presentation of symbols (e.g. +, -, ×, ÷, %, *) in tables and figures; and (4) complete and comprehensive revision of the manuscript according to	
	the reviewers' comments.
