#### **SPECIFIC COMMENTS TO AUTHORS**

This manuscript is well written, informative to general physicians or expertise. The review is well-written and provides readers interested in this topic with published evidence and also personal experience of the author, along with many cases review. I have only a few suggestions to improve the manuscript. 1. In the abstract, the authors identified 45 pediatric cases and provided the baseline information. Please add the mean age of 45 cases with standard deviation value. 2. In the Case presentation, please provide a full term of 'ENT.' 3. In the Discussion section, please provide an appropriate reference in the second half of the first paragraph

#### **SPECIFIC COMMENTS TO AUTHORS**

The case report is interesting, I have minor comment: The English of the manuscript needs revision. There are numerous grammatical and syntax errors in the manuscript.
