Title: Fertaric acid amends the toxicity, DNA breakdown, and histopathology of liver, kidney, and testis induced by bisphenol A exposure.

Authors: Khaled Mohamed Mohamed Koriem and Kawther Rami Emam.

This is to certify that the final form of the article entitled “Fertaric acid amends the toxicity, DNA breakdown, and histopathology of liver, kidney, and testis induced by bisphenol A exposure” has been revised by a language specialist with experience in translating and editing biomedical papers for submission to English-language international journals.

Please do not hesitate to contact us should you need any additional clarifications on this matter.

Faithfully,

Prof. Dr. Mahmoud Arbid,

Biomedical, PhD, and Professor in Toxicology and Pharmacology at Department of Pharmacology, Medical Research and Clinical Studies Institute, National Research Centre, 33 El-Buhouth Street, Dokki, Giza, Egypt.
