The manuscript has been improved according to the suggestions of reviewers:

1 - Format has been updated.

2 - Revisions have been made according to the suggestions of the reviewers:

Reviewers 2 and 3 asked for a few simple line drawings/schematic figures demonstrating these various approaches/procedures.

We appreciate and have addressed these comments by adding 4 new and original figures that demonstrate (1) Roux-en-Y gastric bypass anatomy (**new Fig. 1**), (2) enteroscopy-assisted ERCP (**new Fig. 2**), (3) gastrostomy-assisted ERCP (**new Fig. 5**), and (4) EUS-guided antegrade biliary interventions (**new Fig. 6**).

We also modified the existing **Fig. 3** to ensure there would be no possibility of copyright infringement.

3 - References and typesetting were corrected, where appropriate
