SPECIFIC COMMENTS TO AUTHORS

Just as a letter to the editor, authors summarized the main idea of the review. Moreover, the authors also added more therapeutic methods for PC patients to be evaluated in the future. For example, it carefully focused on the clinical trials' outcomes of new combination therapy and immunotherapy for PC, especially the combination of erlotinib and gemcitabine and the efficacy of PD-1 antagonist. The results on PD-1, as the authors mentioned, is a bit promising and we will keep an eye on future relative trials.

SPECIFIC COMMENTS TO AUTHORS

This is a manuscript made to help clinicians by stating additional considerations to the existing review paper. It is still difficult to apply clinically, but I think it is a sufficient manuscript to be published.

SPECIFIC COMMENTS TO AUTHORS

The Letter to the Editor is on an interesting topic. However the manuscript needs editing by an expert/software to improve language usage.
