Dear Dr. Sheth,

I am writing in response to your request for a statistical review of your paper, '**EVALUATING THE ACCURACY OF ASGE GUIDELINES IN PATIENTS WITH ACUTE GALLSTONE PANCREATITIS WITH INTERMEDIATE OR HIGH PROBABILITY FOR CHOLEDOCHOLITHIASIS**'. As the BIDMC Director of the Harvard Catalyst Biostatistics Consulting Program, I reviewed the statistical methods and reporting of results. I am happy to report that the statistical analyses conducted and the presentation of results are appropriate for the study questions.

Please let me know if I can provide any additional information.

Best,  
Roger
