SPECIFIC COMMENTS TO AUTHORS

The authors reported one rare gastric dedifferentiated liposarcoma. The paper is well written and has a value to be published. 1. What does that mean "vertical" resection margin? You meant deep margin or others? 2. In the discussion, the authors should discuss how the possibility of metastatic DL was excluded.

SPECIFIC COMMENTS TO AUTHORS

This case report showed us An unusual case of primary gastric dedifferentiated liposarcoma resected endoscopically. The article was well-written and showed us a rare case of gastric liposarcoma. It reminded us when diagnosing unexplained masses in the stomach, there is some possibility of liposarcoma in the stomach, and endoscopic resection is helpful for the diagnosis and treatment of the disease. However, the etiology and pathogenesis of this tumor in the stomach deserve further investigation.
