

Óscar Manuel Domingos Lourenço
Assistant Professor
Faculty of Economics, University of Coimbra
Coimbra, Portugal

Certificate of Statistical Methods

Coimbra, January 14, 2022

To whom it may concern

This letter is to certificate that I have read and revised all statistical methods adopted in the paper entitled “Usefulness of C Reactive Protein and Calprotectin in the Early Detection of Colorectal Anastomotic Leak: A Prospective Observational Study”. It is my strong believe that all statistical methods and techniques adopted are appropriate for the research goals and that all conclusions can be derived from the results obtained.

Do not hesitate to contact me if you have any questions.

Sincerely,

Óscar Lourenço, Professor of Quantitative Methods at the Faculty of Economics,
University of Coimbra.
