PEER-REVIEW REPORT

Name of journal: World Journal of Clinical Cases

Manuscript NO: 74958

Title: Complete resection of large-cell neuroendocrine and hepatocellular carcinoma of

the liver: A case report

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 05391966 Position: Peer Reviewer Academic degree: PhD

Professional title: Doctor

Reviewer's Country/Territory: China

Author's Country/Territory: South Korea

Manuscript submission date: 2022-02-16

Reviewer chosen by: Dong-Mei Wang

Reviewer accepted review: 2022-04-27 01:46

Reviewer performed review: 2022-05-04 12:02

Review time: 7 Days and 10 Hours

Scientific quality	[] Grade A: Excellent [] Grade B: Very good [Y] Grade C: Good [] Grade D: Fair [] Grade E: Do not publish
Language quality	[] Grade A: Priority publishing [Y] Grade B: Minor language polishing [] Grade C: A great deal of language polishing [] Grade D: Rejection
Conclusion	[] Accept (High priority) [] Accept (General priority) [Y] Minor revision [] Major revision [] Rejection
Re-review	[Y]Yes []No

SPECIFIC COMMENTS TO AUTHORS

This manuscript is interesting, and I recommend the acceptance after some revision. 1. This manuscript should be prepared according to the guideline of BPG publishing. 2. Some information was missing, such as "The Institutional Review Board of OO National University Hospital Clinical Trial Center approved the study (approval no. 2201-005-111)." OO refers to what? Trial may be corrected as Trail. 3. The more detailed description of Figure legend should be corrected.

SPECIFIC COMMENTS TO AUTHORS

This manuscript reports a rare case with collision tumors consisting of large-cell neuroendocrine (90%) and hepatocellular(10%). Here are two suggestions for revising this manuscript. 1. According CARE Checklist-2016, Key Words should include four to seven words, and should include "case report" as one of the words. 2. Considering the rarity of neuroendocrine carcinoma of the liver, and PETCT is not a specific test for neuroendocrine tumors, how to explain that neuroendocrine tumors of the liver may metastasize from neuroendocrine carcinomas of other organs?
