

ANSWERING REVIEWERS

January 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 7506-review.doc).

Title:

Authors: Anand Wadhawan Gurpreet and Ludwig Theodor Heuss

Name of Journal: *World Journal of Gastrointestinal Endoscopy*

ESPS Manuscript NO: 7506

The manuscript has been improved according to the suggestions of the reviewers.

1 The format was updated.

2 Revisions were made according to the suggestions of the reviewer.

(1) Constructive comments were provided, and no revisions were suggested (reviewed by 00183279).

(2) The following requested minor changes were incorporated (reviewed by 00503931):

- The ASA classification was determined by the gastroenterologist performing the colonoscopy.
- Colonoscopy was a diagnostic intervention in this study.
- The average colonoscopy duration was 17.2 ± 6.4 min.

3 We added the term "pilot study" to the title because we believe it is important to include this term in the title. Because of the limited word count, it was not possible to include the term "pilot study" in the running title itself (reviewed by 00503966).

4 Minor language polishing was performed (reviewed by 00158975).

5 The references and typesetting were corrected.

6 The contributions by Karolina Zdrnja, RN, were insufficient to justify authorship. We mentioned her in the Acknowledgements.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely,

Handwritten signature of Ludwig T. Heuss in black ink.
