

PEER-REVIEW REPORT

Name of journal: World Journal of Hepatology

Manuscript NO: 75159

Title: Small extracellular vesicles and liver diseases: From diagnosis to therapy

Provenance and peer review: Invited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 04738361 Position: Peer Reviewer Academic degree: PhD

Professional title: Director, Research Scientist

Reviewer's Country/Territory: France

Author's Country/Territory: Japan

Manuscript submission date: 2022-01-17

Reviewer chosen by: AI Technique

Reviewer accepted review: 2022-01-19 17:11

Reviewer performed review: 2022-01-26 10:27

Review time: 6 Days and 17 Hours

SPECIFIC COMMENTS TO AUTHORS

Manuscript ID: 75159 describes the implication of small extracellular vesicles or exosomes in liver diseases. This mini-review is indeed very interesting, however, there are some points that should be addressed. *Please add line numbers to address easier. *There are many sentences that report a fact but without a proper reference. E.g. page 5 line 2, line20; page 6 line 8; page 7 line11; page 8 line 4 and last line. *The authors did not give their opinion regarding many subjects. This should be indeed added. *The authors did not give any information regarding other types of EVs. Are they even studied in liver disorders? *What are the limitation of EV administration to treat liver disorders? and what is their advantage over cell therapy? *In general, this review manuscript did not enter enough into mechanistic details of EV biology.

SPECIFIC COMMENTS TO AUTHORS

It's a good attempt. Needs minor revision in the form of minor language polishing.
