## SPECIFIC COMMENTS TO AUTHORS

The study describes the use of hydrogen intervention in refractory wounds after radiotherapy. It is a novel method, underdescribed that could be a potential treatment in that kind of patient. After a rapid review of the main databases, not many manuscripts have used the same treatment. After a rapid review of the main databases, not many manuscripts have used the same treatment. By that, this manuscript presents a new strategy for wound healing after radiotherapy. English should be analyzed one more time to detect grammar mistakes. The manuscript fulfills in a good way the checklist. However, the punctuation and figure legends should be reviewed again (Figure. 1 or Figure 1?). In the same sense, do not initiate a paragraph with Figure 1. The paragraph should be initiated with indentation? or not? Please, to uniform in the whole document. The Images should be processed in professional software i.e. Adobe Photoshop. Please, make sure you meet all the criteria for World Journal of Clinical Cases.

# SPECIFIC COMMENTS TO AUTHORS

The manuscript has been modified in a good way. However, the images need to be improved and edited in Adobe Photoshop in 300 dpi at least.
