-------------------------------------	---

SPECIFIC COMMENTS TO AUTHORS

The authors present their own center's experience, the findings are not novel, however relevant for the readership. The following points need to be considered. 1. The title of the study can be modified to a single center experience from Jordan instead of including the hospital 2. Was there a difference amongst disease severity amongst different malignancy groups, statistical analysis can be utilized to address this 3. limitations of the study should be added
