

PEER-REVIEW REPORT

Name of journal: *World Journal of Clinical Cases*

Manuscript NO: 76635

Title: Frontiers of COVID-19-related myocarditis as assessed by cardiovascular magnetic resonance

Provenance and peer review: Invited manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 06283138

Position: Peer Reviewer

Academic degree: MD

Professional title: Researcher

Reviewer's Country/Territory: Janan

Author's Country/Territory: China

Manuscript submission date: 2022-03-23

Reviewer chosen by: AI Technique

Reviewer accepted review: 2022-03-27 21:13

Reviewer performed review: 2022-04-04 18:25

Review time: 7 Days and 21 Hours

Scientific quality	<input type="checkbox"/> Grade A: Excellent <input checked="" type="checkbox"/> Grade B: Very good <input type="checkbox"/> Grade C: Good <input type="checkbox"/> Grade D: Fair <input type="checkbox"/> Grade E: Do not publish
Language quality	<input type="checkbox"/> Grade A: Priority publishing <input checked="" type="checkbox"/> Grade B: Minor language polishing <input type="checkbox"/> Grade C: A great deal of language polishing <input type="checkbox"/> Grade D: Rejection
Conclusion	<input type="checkbox"/> Accept (High priority) <input checked="" type="checkbox"/> Accept (General priority) <input type="checkbox"/> Minor revision <input type="checkbox"/> Major revision <input type="checkbox"/> Rejection
Re-review	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

SPECIFIC COMMENTS TO AUTHORS

First comment: The manuscript aligns with the provided aims and scopes. And overall the discussions are well elaborated. However, it would be great if the authors can add a few lines explaining "Abnormal coagulation" as one of the potential mechanisms explaining cardiovascular damage following COVID-19 infection. The paragraph seemed to lack sufficient explanation on it. Second Comment: Majority of the available data is in form of case reports and observational studies which focus on CMRI performed under acute settings. If the follow-up significant enough to support the findings derived under the heading of chronic myocarditis? Would be great if authors can comment on this in the review and acknowledge it in the limitations as well.

SPECIFIC COMMENTS TO AUTHORS

Comments to authors 1. Please upload Non-Native Speakers of English Editing Certificate. I did not see this certificate. 2. overall language quality are good but still need revision. 3. The authors said this is a mini review but I did not see any search strategy, there are more published articles please include them with search strategy. 4. Please write a paragraph regarding the method section, even you said this is a mini review but still need search strategy in the databases. 5. please revise your references up to date. 1 Title. Does the title reflect the main subject/hypothesis of the manuscript? Yes, but not completely. 2 Abstract. Does the abstract summarize and reflect the work described in the manuscript? Partially 3 Key words. Do the key words reflect the focus of the manuscript? 4 Background. Does the manuscript adequately describe the background, present status and significance of the study? no 5 Methods. Does the manuscript describe methods (e.g., experiments, data analysis, surveys, and clinical trials, etc.) in adequate detail? NO 6 Results. Are the research objectives achieved by the experiments used in this study? What are the contributions that the study has made for research progress in this field? Not deatil 7 Discussion. Does the manuscript interpret the findings adequately and appropriately, highlighting the key points concisely, clearly and logically? Are the findings and their applicability/relevance to the literature stated in a clear and definite manner? Is the discussion accurate and does it discuss the paper's scientific significance and/or relevance to clinical practice sufficiently? Partially 8 Illustrations and tables. Are the figures, diagrams and tables sufficient, good quality and appropriately illustrative of the paper contents? Do figures require labeling with arrows, asterisks etc., better legends? Yes 9 Biostatistics. Does

the manuscript meet the requirements of biostatistics? No 10 Units. Does the manuscript meet the requirements of use of SI units? Yes 11 References. Does the manuscript cite appropriately the latest, important and authoritative references in the introduction and discussion sections? Does the author self-cite, omit, incorrectly cite and/or over-cite references? The authors should revise references because there is more published papers in 2022 12 Quality of manuscript organization and presentation. Is the manuscript well, concisely and coherently organized and presented? Is the style, language and grammar accurate and appropriate? Partially Yes 13 Research methods and reporting. Authors should have prepared their manuscripts according to manuscript type and the appropriate categories, as follows: (1) CARE Checklist (2013) - Case report; (2) CONSORT 2010 Statement - Clinical Trials study, Prospective study, Randomized Controlled trial, Randomized Clinical trial; (3) PRISMA 2009 Checklist - Evidence-Based Medicine, Systematic review, Meta-Analysis; (4) STROBE Statement - Case Control study, Observational study, Retrospective Cohort study; and (5) The ARRIVE Guidelines - Basic study. Did the author prepare the manuscript according to the appropriate research methods and reporting? Not I did not any guideline? 14 Ethics statements. For all manuscripts involving human studies and/or animal experiments, author(s) must submit the related formal ethics documents that were reviewed and approved by their local ethical review committee. Did the manuscript meet the requirements of ethics? The reviews did not require ethical approval.
