## Editorial Board

### World Journal of Gastroenterology (WJG)

Dear Editor,

I hereby certify that I have made considerable language editing to the manuscript by Dr. Hongtao Li et al entitled "Short-term efficacy of laparoscopic-assisted radical gastrectomy versus open radical gastrectomy in patients with gastric cancer".

I have considerable experience in editing scientific papers for various SCI journals. I serve as an editor and guest editor for several well-cited international journals.

Sincerely,

**Liang QIAO, PhD, MD**
