SPECIFIC COMMENTS TO AUTHORS

The review study of this subject is very important. According to Table 1, the levels of FFA is lower than control on subjecting gliclazide as a drug. Therefore, the authors have to modify the title of the manuscript to be "Some sulfonylurea drugs increase serum free fatty acid in diabetic patients: a systematic review and meta-analysis". Moreover, in Table 1, no levels of TG, TC, LDL, and HDL as shown in the table legend. TG is the abbreviation of triglycerides and TC is the abbreviation of total cholesterol. These abbreviation were reversed in the legend. The authors have to rewrite some sentences such as in page 6 (lines 7-10) and lines 21-24). The numbers in page 8 (lines 21-23) have to be changed to a word. The number in page 8 (line 28) is 61.5. The sentence "To comprehensively analyze the effects of SU on plasma FFA, we also conducted a series of subgroup analyses (Table 2)" in page 9 (lines 16-18) should be corrected or rewritten. Also, the sentence at the end of page 10 should be rewritten. In page 11 (line 8), duration but not durations. In the page (line 14), "RCT, which" but not "RCT, that".
