SPECIFIC COMMENTS TO AUTHORS

In this review article about Hypertension in kidney transplant recipients, Alexandrou et al have summarized the etiology and management of HTN in kidney transplant recipients. It is well written and clear. However, it lacks novelty. There are 100's of papers in this field, so I am not sure what will be added in the field with this review article. --would focus more on the secondary causes of HTN, and work up pertinent to the kidney tx --Role of immunos and CNI minimization

SPECIFIC COMMENTS TO AUTHORS

24-h ABPM outperforms office BP measurements for kidney transplant recipients. Dihydropyridine CCBs are recommended to treat hypertension of kidney transplant recipients. It has guiding significance to clinic.
