SPECIFIC COMMENTS TO AUTHORS

Dear Authors, Although the study is technically sound, the study doesn't add new things to the routine management of the catastrophic ICA injuries. Best regards

SPECIFIC COMMENTS TO AUTHORS

The manuscript describes management strategies in cases of intraoperative internal carotid artery (ICA) injuries. The authors were able to elaborate the appropriate measures taken to manage internal carotid artery injuries in 4 cases of ICA injuries. No significant grammatical or spelling errors were found. Overall, a well-written article.

SPECIFIC COMMENTS TO AUTHORS

Dear Authors, Thank you for conducting this study. The presentation of the 4 cases became more powerful with the newly added two tables. However, the following notes should be revised to improve the presentation of the article. Best regards

1. The title exceeds the upper limit of the words as required by the journal (it consists of 19 words).
2. Abstract: a. A case summary is not sufficient in describing the cases. b. The conclusion is too long to follow.
3. Introduction: This section describes only the incidence of ICA injuries with different neurosurgical approaches. It doesn't give us anything about how they managed, particularly with regard the anesthesiologist's point of view. Therefore, the benefit of the article is not clearly stated.
4. Case presentation a. Only one figure for one case. Besides, the panels of the figure require labeling with arrows. b. Table 1: 1. I suggest the following legend "The demographic and clinical characteristics of the 4 patients". 2. You should write the full term of the abbreviation "ICA". 3. yo→y (year). c. Table 2: 1. It is better to change the words "death and recovery" to "died and recovered". 2. I suggest the following legend "Anesthesia management for subsequent surgery and the clinical outcome of the 4 patients". 3. Urine: you mean urine output.
5. Discussion: I suggest that the last paragraph becomes the conclusion and you can delete the conclusion section because it is too long to follow.
