SPECIFIC COMMENTS TO AUTHORS

Dear author: i think it's a good review for this topic, but this article has many issues on review. There are listed behind. Major issues: 1. There are no figure attached with this article and we cannot see the figure of MRI to confirmed it's a hepatic tumor, which was impressed as an atypical pattern hepatocellular carcinoma 2. There were 4516 results when I search "inflammatory myofibroblastic tumor" on Pubmed and it is not so rare in the world, but I think it is relatively rare in China. This article need a spot light to tell us the main value of this article. 3. This article need a lot English polishing, for example, in abstract," and was treated by laparoscopic partial hepatectomy" should not be presented in the first without detailed explanation the case. Minor issues: 1. English polishing needed in the whole article In the conclusion, the sentence of " Laparoscopic partial hepatectomy should be regard as principal choice in treatment of patients with IMTL" is not usual in English. 2. In case presentation, "A 29-year-old man was complained of general weakness, slight discomfort in the upper abdomen, and there was no obvious tenderness and mass in the abdomen." I think this might be on physical exam, because finally this is a case of hepatic mass. 3. abnormal? prothrombin (APT) (19.31mAU/ml, normal range: 11.12-32.01), but this data seems normal

SPECIFIC COMMENTS TO AUTHORS

The authors have presented an interesting case of inflammatory myofibroblastic tumor of liver. I have following comments regarding the manuscript. 1. Please mention the appropriate name of the surgery such as laparoscopic left lateral segmentectomy or left hepatectomy. 2. Did CRP levels reduce in the postoperative period? What was the latest CRP value? 3. Was steroids used in the patient once preoperative diagnosis of inflammatory myofibroblast was made? 4. Please add the operative time and intraoperative bood loss. 5. The figure legends are present but the figures are missing. Please provide all the figures for review.
