SPECIFIC COMMENTS TO AUTHORS

Thank you for providing this rare case. Some suggestions for your further consideration and modification before publishing.

1. In the summary section , the main complaint was not consistent with the main portion of the article.
2. I was wondering why you did not provide any amylase data for this patient with pancreatitis.
3. Arrows should be applied in the imaging to indicate the main finding on it.
4. The structure of the article is not proper, need to be modified. For example, the last sentence of diagnostic imaging should move to the treatment section.
5. APTT should be monitored if intravenous administration of heparin with 12000 U/day for 25 days , but you did not mention in the article.
6. The discussion part was too simple, you should reveal the intrinsic relationship of pancreatitis and thrombotic vasculitis.

In addition to, you should highlight what the readers can learn from your report.
