## TO THE EDITOR

---

Thank you for your letter and for the reviewers' comments concerning our manuscript entitled "Correction to "Laparoscopy-assisted resection of colorectal cancer with situs inversus totalis: A case report and literature review"[1]" (ID: Manuscript NO. 77875, Correction). Those comments are all valuable and very helpful for our paper.

The previous TNM stage of colorectal cancer is T4aN0M0, which has been replaced by the revised TNM stage (T4aN1cM1c). Since the specific number of versions of tumor staging was not indicated in our previous text, the staging of the tumor was different from the latest one. Therefore, we would like to modify the postoperative staging of tumors, which should be T4aN1cM1c.
