SPECIFIC COMMENTS TO AUTHORS

1. The background of the abstract mentions that "coordinated definition of metabolic syndrome is used", and it is suggested to expand and explain the specific content of this definition. 2. History of present illness is incomplete, so the patient's previous medical history of therapeutic intervention can be added. 3. References are in an incorrect format, please refer to the author guidelines or to the published articles for modification.

SPECIFIC COMMENTS TO AUTHORS

The key question is why the article didn't address the role of metformin (a beneficial insulin sensitizer in PCOS) either in its mechanistic or discussion, particularly as this case has primarily IR with prediabetes, along with failure of the diet regimen in the second cycle? The second question is about the manifestations of hyperandrogenism in the case which has been omitted
