

PEER-REVIEW REPORT

Name of journal: *World Journal of Clinical Cases*

Manuscript NO: 78543

Title: Development and Validation of a Risk Assessment Model for Prediabetes in China
National Diabetes Survey

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 05405614

Position: Editorial Board

Academic degree: PhD

Professional title: Associate Professor

Reviewer's Country/Territory: Nigeria

Author's Country/Territory: China

Manuscript submission date: 2022-09-05

Reviewer chosen by: AI Technique

Reviewer accepted review: 2022-09-07 08:30

Reviewer performed review: 2022-09-07 22:52

Review time: 14 Hours

SPECIFIC COMMENTS TO AUTHORS

This is a very interesting manuscript showing how you can contribute to risk assessments when you count on wide public databases. All statistics methodologies are proper, and to this reviewer, a very useful assessment model for prediabetes was developed and validated in the general population. This model must be implemented in the clinics and extended to bigger populations, considering other factors such as ethnicities. This manuscript highlights the importance of risk assessment models in public health for early interventions for diabetes prevention.
