

## PEER-REVIEW REPORT

**Name of journal:** *World Journal of Gastroenterology*

**Manuscript NO:** 78908

**Title:** Immunotherapy-based novel nanoparticles in the treatment of gastrointestinal cancer: Trends and challenges

**Provenance and peer review:** Invited manuscript; Externally peer reviewed

**Peer-review model:** Single blind

**Reviewer's code:** 03805255

**Position:** Peer Reviewer

**Academic degree:** PhD

**Professional title:** Associate Professor

**Reviewer's Country/Territory:** Serbia

**Author's Country/Territory:** China

**Manuscript submission date:** 2022-07-21

**Reviewer chosen by:** AI Technique

**Reviewer accepted review:** 2022-07-25 03:28

**Reviewer performed review:** 2022-08-03 20:37

**Review time:** 9 Days and 17 Hours

### **SPECIFIC COMMENTS TO AUTHORS**

Dear Authors in your review article is very interesting and deserved attention. There is lack of literature search explanation, tables could contribute to the clarity of manuscript. Otherwise it contains a lot of data about preclinical studies which are candidate for further clinical trials.

### **SPECIFIC COMMENTS TO AUTHORS**

I truly appreciate all the hard work the study group invested in this review. The topic is a hot one and very much needed for patients with different types of GI cancer. The manuscript is clear, up-to-date and written with attention to details. The authors inserted a lot of data from recent studies. However, in order to make it more useful and organized, I would suggest to summarize the mentioned studies in tables. Either tables for every type of cancer (gastric, colorectal, pancreatic, and hepatocellular carcinoma) or tables including all types of cancer, organized by “in vitro” studies and “in vivo” ones. Or, any other structure the authors would prefer. Just please summarize the data in tables. It is very important. Please also mention what databases were searched for articles and the period. Also, “Conclusion and Future directions” paragraph is way too long. Moreover, it contains data that was previously written. There is no point in repeating what was already written. Redundancy is not recommended. Conclusion should be short and crispy. Maybe this paragraph could be split in two: Future Directions and Conclusion. Usually, conclusion should not contain references...since they have already been used. There are a few typos - minor correction of the English language is required; among them - very important - page 396 please replace “fetal” with “fatal”. There are no «Conflict-of-Interest Disclosure Form » and « Copyright License Agreement». Please add the respective files. Please provide the Authors’ ORCID Numbers. The format of the references is not the one requested by the journal. Please revise.
