SPECIFIC COMMENTS TO AUTHORS

Thanks for the manuscript provided by the author, but there are some major design defects in the manuscript. 1. Introduction should provide gap of knowledge in previous studies and your innovation ideas 2. Attach ethics number 3. Explain how to calculate the sample size 4. The fundings in the first and last pages of the manuscript are inconsistent 5. Whether the patient's grip strength, muscle strength and walking speed can be used to diagnose sarcopenia, and whether imaging inspection is required 6. The research results of this study are of limited clinical value, and the effectiveness of the three diagnostic criteria cannot be explained only by the prevalence rate
