**SPECIFIC COMMENTS TO AUTHORS**

1.The authors described three cases of pulmonary cryptococcosis in patients with CD who received immunomodulatory treatment. Pulmonary cryptococcus infection is an opportunistic infection that occurs in immunocompromised patients with CD, which is important for the clinicians in the practice. 2.However, in your figures, you should present more larger fold of HE staining pictures, so as to confirm the infection of the fungus. 3.The paper is well written and the language quality is excellent.

**SPECIFIC COMMENTS TO AUTHORS**

Comments to the Editor: Thanks for inviting me to review the article entitled "Pulmonary cryptococcosis after immunomodulator treatment in patients with Crohn's disease: three case reports and literature review" Comments to the authors: 1. TITLE It reflects the major content of the article. 2. ABSTRACT It gives a clear delineation of the research background. Duration for treatment with fluconazole is missing and has to be added. Conclusion is presented. 3. INTRODUCTION o Provides sufficient background regarding the studied topic. o The aim is clearly identified. 4. Case Presentation: Full description is provided for this section; however, the following have to be considered: o Abbreviations are better to be avoided. o Case 2: dose of IFX has to be mentioned. o Case 3: dose of MP has to be mentioned. o Laboratory examinations: Metagenomic sequencing is missing for all cases and has to be added. Case 2: CA-125, G test & GM test: significance & indication for each are better to be mentioned. Case 3: significance & indication for each are better to be mentioned. Tables (1& 2) are informative, but a column for co-morbidity is better to be added for table (2) Fig (2-A) legend: treatment has to be specified. o Treatment: Case (1): Start of
