

## 79219-Answering Reviewers

This letter aims to provide point-by-point responses to each of the issues raised in the peer-review report.

### Reviewer #1:

No issues were raised in the peer-review report. Furthermore, language polishing was performed to meet the publication requirement (Grade A).

### Reviewer #2:

Answering the issues raised in the peer-review report:

**Figure1: Clarithromycin - 500 mg 24/24h, 500mg 12/12h?** Indeed the recommended therapy consists of Clarithromycin 500 mg 12/12h. The information was mistyped and it has been corrected.

**Levofloxacin - 50 mg 24/24h, 500mg?** Indeed the recommended therapy consists of Levofloxacin 500 mg 24/24h. The information was mistyped and it has been corrected.

**Table 1: Gisbert, J. P.[15] No eradication rate for 10 days and 14 days group.** In this study, Gisbert, J. P., found no statistical difference between eradication rates for 7 days, 10 days and 14 days group. The eradication rates in table 1 regard all the patients included in the study (67% by PP and 65% by ITT). This line has been adjusted in table 1 in order to avoid further issues.
