# Certificate of Statistical Analysis

This is to certify that the paper entitled, "**Baseline moderate-range albuminuria is associated with protection against severe coronavirus disease-19 pneumonia**," submitted by Bashkin et al. to the World Journal of Diabetes, has been statistically analyzed by myself, a statistician.

I declare that I have a degree in statistics from Haifa University, graduation year 1992. In 1999, I graduated with an MA degree in Sociology, which included a significant portion of studies from the MA curriculum in the Department of Statistics. Since 1999, I have been working as a statistician at the Galilee Medical Center and providing statistical consulting services in medical research.

I guarantee the quality of the statistical analysis in this paper.

Orly Yakir, BA, MA
