| 2        | Editorial Office's Comments  | [Y]      |

|   | Science Editor: Reference 39 and reference 40 are same, please          |     |
|---|---|-----|
|   | delete reference 40 and rearrange the references in numeral order.      |     |
|   | Or you can use a similar reference to replace one of them.              |     |
|   | Company Editor-in-Chief: I recommend the manuscript to be               |     |
|   | published in the World Journal of Clinical Pediatrics. Before final     |     |
|   | acceptance, when revising the manuscript, the author must               |     |
|   | supplement and improve the highlights of the latest cutting-edge        |     |
|   | research results, thereby further improving the content of the          |     |
|   | manuscript. To this end, authors are advised to apply a new tool,       |     |
|   | the Reference Citation Analysis (RCA). RCA is an artificial             |     |
|   | intelligence technology-based open multidisciplinary citation           |     |
|   | analysis database. In it, upon obtaining search results from the        |     |
|   | keywords entered by the author, "Impact Index Per Article" under        |     |
|   | "Ranked by" should be selected to find the latest highlight articles,   |     |
|   |   |     |
|   | which can then be used to further improve an article under              |     |
|   | preparation/peer-review/revision. Please visit our RCA database         |     |
|   | for more information at:  |     |
|   | https://www.referencecitationanalysis.com/.                             |     |
| 3 | The fixed headings are copied.  | [Y] |
|   | The title concisely summarizes the main topic of the study and is       |     |
|   | not too long (no more than 18 words). Words such as 'exploration',      |     |
| 4 | 'research', 'analysis', 'observation', and 'investigation' are avoided. | [Y] |
|   | The title does not start with 'The' and does not include any Arabic     |     |
|   | numbers or uncommon abbreviations.                                      |     |
| 5 | A short running title is provided (no more than 6 words).               | [Y] |
|   |   |     |

|    | The authors' full family (sur)names and full/abbreviated first          |     |
|----|---|-----|
| 6  | names are listed on the title page and are consistent with those        | [Y] |
|    | listed in the signed BPG Copyright License Agreement form.              |     |
|    | The 'Author contributions' passage describes the specific               |     |
|    | contribution(s) made by each author. The author's names are listed      |     |
|    | in the following format: full family (sur)name followed by              |     |
|    | abbreviated first and middles names.                                    |     |
|    | e.g., "Wang CL and Liang L contributed equally to this work; Wang       |     |
| 7  | CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the               | [Y] |
|    | research study; Wang CL, Zou CC, Hong F and Wu XM performed             |     |
|    | the research; Xue JZ and Lu JR contributed new reagents and             |     |
|    | analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and       |     |
|    | Wang CL, Liang L and Fu JF wrote the manuscript. All authors            |     |
|    | have read and approve the final manuscript."                            |     |
|    | The 'Supported by' statement describes the source(s) of financial       |     |
| 8  | support and includes the corresponding identification number(s)         | [N] |
|    | and program ID(s) if available, and contains no spelling errors.        |     |
|    | The 'Corresponding author' passage provides the corresponding           |     |
|    | author's full first and family (sur)names, abbreviated title (e.g., MD, |     |
| 9  | PhD), affiliated institute's name and complete postal address           | [Y] |
|    | (including zip code) and e-mail (written in all lowercase), and         |     |
|    | contains no spelling errors.  |     |
|    | The Manuscript Tracking information (i.e., Received, Peer review        |     |
| 10 | started, First decision, Revised, Accepted, Article in press, and       |     |
|    | Published online) are provided along with the corresponding editor      | [Y] |
|    | and date for each item, and contain no spelling errors.                 |     |
| 11 | The Abstract section is formatted according to the article-specific     |     |
|    | style (structured vs unstructured) and word count thresholds, as        |     |
|    | follows:  | [Y] |
|    | Commentary, Frontier, Diagnostic Advances, Medical Ethics,              |     |
|    |   |     |

|    | Minireview, Review, Therapeutics Advances, and Topic Highlight:                |     |
|----|--|-----|
|    | Non-structured abstract that is no less than 200 words.                        |     |
|    | Field of Vision, Case Report and Letter to the Editor:                         |     |
|    | Non-structured abstract that is no less than 150 words.                        |     |
|    | Research articles: Structured abstract with subsections for AIM (no            |     |
|    | more than 20 words); METHODS (no less than 80 words); RESULTS                  |     |
|    | (no less than 120 words); and CONCLUSION (no more than 26                      |     |
|    | words).  |     |
|    | The 'Key words' list provides 5-10 keywords that reflect the main              |     |
| 12 | content of the study. The first letter of each keyword is capitalized,         | [Y] |
|    | and each keyword is separated by a semicolon.                                  |     |
|    | The "citation" contains authors' names and manuscript title. The               |     |
|    | name of the first author should be typed in bold letters; the family           |     |
|    | (sur) name of all authors should be typed with the first letter                |     |
|    | capitalized, followed by their abbreviated first and middle initials.          |     |
| 13 | For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick              | [Y] |
|    | Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM,                |     |
|    | Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes                     |     |
|    | mellitus increases the risk of gastric cancer: A meta-analysis. <i>World J</i> |     |
|    | <i>Gastroenterol</i> 2019; In press  |     |
|    | The 'Core tip' provides a summary (less than 100 words) of the                 |     |
| 14 | study that outlines the most innovative and important arguments                |     |
|    | and core contents of the paper and will serve to effectively attract           | [Y] |
|    | readers.   |     |
| L  | 1  |     |

|    | F   |      |
|----|---|------|
|    | The 'INTRODUCTION' section clearly describes the relevant   |      |
|    | background information for the study. Only the most relevant and                                  |      |
|    | current (within the past 5 years) literature is cited, with the                                   |      |
|    | exception of rare instances of seminal literature citations. All                                  |      |
|    | technical terms and/or abbreviations are explained and/or defined,                                |      |
| 15 | with the full name of abbreviations given upon first appearance in                                |      |
| 15 | the text and the abbreviation presented in parentheses [i.e.,                                     | [Y]  |
|    | "computed tomography (CT)"]. First-person pronouns (e.g., 'I',                                    |      |
|    | 'we') are used appropriately to clearly indicate the work performed                               |      |
|    | by the author(s). When weaknesses of previous studies are   |      |
|    | described in the text to highlight the innovations related to the                                 |      |
|    | current study, the information is presented carefully.  |      |
|    | The 'MATERIALS AND METHODS' section clearly and accurately  |      |
| 10 | describes all materials and methods used to obtain the data                                       | 5.27 |
| 16 | presented in the article and is adequate for a reader to repeat the                               | [Y]  |
|    | study.  |      |
|    | The 'RESULTS' section concisely describes the observational and                                   |      |
|    | experimental results. Representative data and data that have                                      |      |
|    | scientific significance are emphasized. Data is presented in either                               |      |
| 17 | the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is               | [Y]  |
|    | not repeated among each. Information presented in the tables and                                  |      |
|    | figures clearly describes the trends, meaning, and inferences.                                    |      |
|    | Results described in textual form are accurate, concise and clear.                                |      |
| 18 | Statistical symbols are accurate. Statistical significance is expressed                           |      |
|    | as ${}^{a}P < 0.05$ , ${}^{b}P < 0.01$ ( $P > 0.05$ usually does not need to be denoted).         |      |
|    | If there are other series of <i>P</i> values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used,         | [N]  |
|    | and a third series of <i>P</i> values is expressed as ${}^{\circ}P < 0.05$ and ${}^{f}P < 0.01$ . |      |
|    | Statistical data is expressed as mean $\pm$ SD or mean $\pm$ SE.                                  |      |
|    |   |      |

| 19The 'DISCUSSION' section (1) describes the main purpose and<br>hypothesis of the study; (2) summarizes the most important results;<br>(3) illustrates and explains the results (but does not simply repeat<br>the data) and draws conclusions or inferences based on the results;<br>(4) points out the limitations of the study and their impact on the<br>results, as well as proposes further advice on future research<br>topic(s) or direction(s); and (5) describes the theoretical significance<br>and practical value of the findings.[N]20The 'ACKNOWLEDGEMENTS' section expresses gratitude to any<br>individuals or organizations for technical support ( <i>i.e.</i> , providing<br>instrumentation, equipment or experimental materials, and/or<br>assistance in experimental work), non-technical services ( <i>i.e.</i> , useful<br>inspiration, suggestions, guidance, or review), and/or any other<br>auxiliary work.[N]21The 'ARTICLE HIGHLIGHTS' section provides comments for<br>original articles in accordance with the specified format.[N]22The 'ARTICLE HIGHLIGHTS' section provides comments for<br>order of the first appearance of a source in the text, or citations<br>where the author's name is indicated in the text, a superscript<br>number should be placed following the name ( <i>i.e.</i> , "Pang et al"). For<br>citations where no author is indicated, a superscript number should<br>be placed at the end of the sentence. Respective examples are: "Mal <sup>11</sup><br>reported,", "Pan et al <sup>12-51</sup> indicated,"; "PCR has a high<br>sensitivity! <sup>16,91</sup> " No superscript numbers are used when the<br>reference number is described in the text; for example, "The<br>experimental method used has been described in reference [8]." The<br>style of reference citations in tables is the same as that in the text<br>( <i>e.g.</i> , Pan <i>et al</i> <sup>12-51</sup> , place see reference [8]). |    | -   |         |
|--|----|---|---------|
| <ul> <li>(3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.</li> <li>The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (<i>i.e.</i>, providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (<i>i.e.</i>, useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.</li> <li>The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format.</li> <li>The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Ma<sup>[1]</sup> reported,", "Pan et al<sup>[25]</sup> indicated"; "PCR has a high sensitivity<sup>[65],"</sup> No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." | 37   | A <i>CrossCheck</i> investigation (an effective tool for detecting unoriginal content, enabling our editors to preserve the journal's integrity and the authors' copyright) has been performed for the manuscript <i>via</i> the website: http://www.ithenticate.com/. The results document contains the following information for the manuscript: "Name of journal", "Manuscript No.", "Columns", "Title" and "Author list". The Figure of the <i>CrossCheck</i> results is saved in JPEG format (.jpg) at 1440 × 680 pixel resolution. The PDF of the <i>CrossCheck</i> results has been saved under the file name: manuscript No CrossCheck report ( <i>e.g.</i> , 870-CrossCheck report). The Google searches have also been performed to further ensure publication of original content. | [Y] |
| 38   | The text of the manuscript is typed in Book Antiqua font, 12 pt, with 1.5 line spacing.   | [Y] |
| Responsibilities<br>of scientific<br>editors | The primary responsibilities of our scientific editors include carefully checking the<br>entire manuscript and all accompanying materials for: (1) errors in spelling,<br>grammar, punctuation and wording; (2) suitability of tables, figures, figure data and<br>legends; (3) accurate and appropriate presentation of symbols ( <i>e.g.</i> +, -, ×, $\div$ , %, *) in<br>tables and figures; and (4) complete and comprehensive revision of the manuscript<br>according to the reviewers' comments.   |     |
