		1
	acceptance, the author(s) must add a table/figure (medical imaging) to	
	the manuscript. There are no restrictions on the figures (color, B/W).	
	Before final acceptance, when revising the manuscript, the author must	
	supplement and improve the highlights of the latest cutting-edge	
	research results, thereby further improving the content of the	
	manuscript. To this end, authors are advised to apply a new tool, the	
	Reference Citation Analysis (RCA). RCA is an artificial intelligence	
	technology-based open multidisciplinary citation analysis database. In	
	it, upon obtaining search results from the keywords entered by the	
	author, "Impact Index Per Article" under "Ranked by" should be	
	selected to find the latest highlight articles, which can then be used to	
	further improve an article under preparation/peer-review/revision.	
	Please visit our RCA database for more information at:	
	https://www.referencecitationanalysis.com/.	
3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is not	[Y]
	too long (no more than 18 words). Words such as 'exploration',	
4	'research', 'analysis', 'observation', and 'investigation' are avoided. The	
	title does not start with 'The' and does not include any Arabic numbers	
	or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
	The authors' full family (sur)names and full/abbreviated first names	[Y]
6	are listed on the title page and are consistent with those listed in the	
	signed BPG Copyright License Agreement form.

contribution(s) made by each author. The author's names are listed in the following format: full family (sur)name followed by abbreviated first and middles names. e.g., "Wang CL and Liang L contributed equally to this work; Wang CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the research study; Wang CL, Zou CC, Hong F and Wu XM performed the research; Xue JZ and Lu JR contributed new reagents and analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and Wang CL, Liang L and Fu JF wrote the manuscript. All authors have read and approve the final manuscript." The 'Supported by' statement describes the source(s) of financial support and includes the corresponding identification number(s) and program ID(s) if available, and contains no spelling errors. The 'Corresponding author' passage provides the corresponding author's full first and family (sur)names, abbreviated title (e.g., MD, PhD), affiliated institute's name and complete postal address (including zip code) and e-mail (written in all lowercase), and contains no spelling errors. The Manuscript Tracking information (i.e., Received, Peer review started, First decision, Revised, Accepted, Article in press, and Published online) are provided along with the corresponding editor and date for each item, and contain no spelling errors. The Abstract section is formatted according to the article-specific style (structured vs unstructured) and word count thresholds, as follows: Commentary, Frontier, Diagnostic Advances, Medical Ethics, Minireview, Review, Therapeutics Advances, and Topic Highlight: Non-structured abstract that is no less than 200 words. Field of Vision, Case Report and Letter to the Editor; Non-structured			_

	Research articles: Structured abstract with subsections for AIM (no	
	more than 20 words); METHODS (no less than 80 words); RESULTS	
	(no less than 120 words); and CONCLUSION (no more than 26 words).	
	The 'Key words' list provides 5-10 keywords that reflect the main	[Y]
12	content of the study. The first letter of each keyword is capitalized, and	
	each keyword is separated by a semicolon.	
	The "citation" contains authors' names and manuscript title. The name	[Y]
l	of the first author should be typed in bold letters; the family (sur) name	
	of all authors should be typed with the first letter capitalized, followed	
10	by their abbreviated first and middle initials. For example, an article by	
13	Jae Moon Yoon, Ki Young Son, Chun Sick Eom, Daniel Durrance, Sang	
	Min Park will be written as Yoon JM, Son KY, Eom CS, Durrance D,	
	Park SM. Pre-existing diabetes mellitus increases the risk of gastric	
	cancer: A meta-analysis. World J Gastroenterol 2019; In press	
	The 'Core tip' provides a summary (less than 100 words) of the study	[Y]
14	that outlines the most innovative and important arguments and core	
	contents of the paper and will serve to effectively attract readers.	
	The 'INTRODUCTION' section clearly describes the relevant	[Y]
	background information for the study. Only the most relevant and	
	current (within the past 5 years) literature is cited, with the exception of	
	rare instances of seminal literature citations. All technical terms and/or	
	abbreviations are explained and/or defined, with the full name of	
15	abbreviations given upon first appearance in the text and the	
15	abbreviation presented in parentheses [i.e., "computed tomography	
	(CT)"]. First-person pronouns (e.g., 'I', 'we') are used appropriately to	
	clearly indicate the work performed by the author(s). When	
	weaknesses of previous studies are described in the text to highlight	
	the innovations related to the current study, the information is	
	presented carefully.

	, , , , , , , , , , , , , , , , , , ,	
	The 'MATERIALS AND METHODS' section clearly and accurately	
16	describes all materials and methods used to obtain the data presented	[N]
	in the article and is adequate for a reader to repeat the study.	
	The 'RESULTS' section concisely describes the observational and	
	experimental results. Representative data and data that have scientific	
	significance are emphasized. Data is presented in either the text, a table	
17	or figure (i.e., chart, diagram, graph or image), but is not repeated	[N]
	among each. Information presented in the tables and figures clearly	
	describes the trends, meaning, and inferences. Results described in	
	textual form are accurate, concise and clear.	
	Statistical symbols are accurate. Statistical significance is expressed as	
	$^{\mathrm{a}}P$ < 0.05, $^{\mathrm{b}}P$ < 0.01 (P > 0.05 usually does not need to be denoted). If	
18	there are other series of P values, ^{c}P < 0.05 and ^{d}P < 0.01 are used, and a	[N]
	third series of P values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01. Statistical	
	data is expressed as mean ± SD or mean ± SE.	
	The 'DISCUSSION' section (1) describes the main purpose and	
	hypothesis of the study; (2) summarizes the most important results; (3)	
	illustrates and explains the results (but does not simply repeat the data)	
19	and draws conclusions or inferences based on the results; (4) points out	[NI]
19	the limitations of the study and their impact on the results, as well as	[N]
	proposes further advice on future research topic(s) or direction(s); and	
	(5) describes the theoretical significance and practical value of the	
	findings.	
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any	
	individuals or organizations for technical support (i.e., providing	
20	instrumentation, equipment or experimental materials, and/or	[N]
20	assistance in experimental work), non-technical services (i.e., useful	[10]
	inspiration, suggestions, guidance, or review), and/or any other	
	auxiliary work.	
21	The 'ARTICLE HIGHLIGHTS' section provides comments for original	[N]
		6 / 10

Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

	articles in accordance with the specified format.	
22	articles in accordance with the specified format. The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript number should be placed following the name (<i>i.e</i> , "Pang <i>et al</i> "). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Ma ^[1] reported", "Pan <i>et al</i> ^[2-5] indicated"; "PCR has a high sensitivity ^[6,9] ." No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in	[Y]
	reference [8]." The style of reference citations in tables is the same as that in the text ($e.g.$, Pan $et~al^{[2-5]}$, please see reference [8]).	
23	Journal references have been verified to ensure that there are no duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of journals in other languages are listed according to indexing information retrieved from Google. Book references are presented with all the information relevant to the electronic version.	[Y]
24	The number of cited references is appropriate for the article type, as follows: Commentary: no less than 50; Review: no less than 100; Article: no less than 30/26; Case Report and Letter to the Editor: no less than 1.	[Y]
25	The ethics-related statements are provided in accordance with the manuscript type (<i>e.g.</i> , Manuscript NoInstitutional review board statement, Manuscript NoAnimal care and use statement, <i>etc.</i>).	[N]

	Ţ	
26	The names of the peer reviewers and the scientific editor are present at	[Y]
	the end of the paper (<i>e.g.</i> , P-Reviewer: Hugot D S-Editor: Wang JL).	[+]
	The order and numerical labeling of tables and figures is consistent	
	with their appearance and presentation in the text. Symbols in tables	
	(e.g., +, -, \times , \div , *) correctly correspond to the definitions in the footnotes.	
27	Only one legend is provided for each multi-panel figure consisting of	[NI]
21	color graphs, black and white graphs, or line graphs that depicts data	[N]
	of the same theme. For example: Figure 1 Pathological changes in	
	atrophic gastritis tissue before and after treatment. A:; B:; C:;	
	D:; E:; F:	
	Split pictures include flow charts, line graphs, histograms, and graphs	[Y]
28	including text. Unsplit pictures include meta-analysis diagrams, PCR	
	amplification curves, and survival curves.	
29	The author(s) highlighted the changes made to the manuscript	[Y]
29	according to the peer-reviewers' comments.	
30	The responses to the peer-reviewers' comments are consistent with the	[Y]
30	changes made to the manuscript.	
	The revised manuscript is provided (file name: Manuscript	[Y]
	NoReview; e.g., 870- Review).	
31	The letter of peer-reviewers' comments is provided (file name:	
31	Manuscript NoPeer-review(s); e.g., 870-Peer-review(s)).	
	The response letter is provided (file name: Manuscript NoAnswering	
	reviewers; e.g., 870-Answering reviewers).	
	The related ethics and relevant documents are provided, such as (1)	[Y]
	Approved grant application form(s) or funding agency copy of any	
	approval document(s) (file name: Manuscript NoGrant application	
32	form(s)); (2) Biostatistics review certificate (file name: Manuscript	
	NoBiostatistics statement); (3) Conflict-of-interest statement (file	
	name: Manuscript NoConflict-of-interest statement); (4) Clinical trial	
	registration statement (file name: Manuscript NoClinical trial
