To Whom It May Concern,

Our editing company provided comprehensive editing services for the manuscript, entitled "*Cytoprotective effects of amifostine, ascorbic acid and N-acetylcysteine against methotrexate-induced hepatotoxicity in rats*", which is under consideration for publication in your journal. The edit was conducted as a global editing service, which corrected the English grammar presentation of the document by modifying syntax and word choice and correcting errors in spelling, punctuation and tense, and which also addressed the overall science content of the document, correcting logical inconsistencies and content structure issues to strengthen the author's voice and style. The final version of the edited document (unprotected word .doc file) that AmEditor returned directly to the author had achieved a "Grade A" score of grammatical presentation (no language polishing required after editing).

Should you require any additional information, please do not hesitate to contact me.

Kind regards,

Jennifer C. van Velkinburgh, PhD
