SPECIFIC COMMENTS TO AUTHORS

Gingival hyperplasia due to cyclosporine administration is not new and well-known adverse effect of the drug. Thus, it is unclear what kind of aspects are novel worth publication. Looking at the MS in its current description, it is unclear regarding this issue. If the authors reported some novel findings based on their clinical experiences upon case series, it may be welcome for submission. Unfortunately, this MS would not meet this aspect.

SPECIFIC COMMENTS TO AUTHORS

How would the findings of this case report alter the management of the Drug induced gingival enlargement? What precautions can be taken while administering systemic drugs to prevent gingival enlargement? Was there any conclusion regarding association between dosage of drug administered and gingival enlargement?

SPECIFIC COMMENTS TO AUTHORS

it maybe too long for a case report , there are repetitions of Introduction and Discussion,
the history can be shortened.
