### **SPECIFIC COMMENTS TO AUTHORS**

Dear authors, I have read with great interest your case report. The co-existence of gastric and colonic MALT lymphoma is rarely reported in the literature, and I consider your paper of value from this point of view. However, I have identified several issues with the paper, which, I consider that, after correction will raise the value of the manuscript: line 17 - please check the requirements for authorship, and adjust accordingly (managing the patient does not qualify for authorship) line 41-42 - please rephrase "gastroenterological endoscope during physical examination"? line 93 - gastric submucosal uplift is not a subjective complaint but an endoscopic lesions, please correct that. Also, please explain the indications for upper GI endoscopy and colonoscopy (was it due to a screening schedule?) line 99 - please rephrase the lack of bowel habits change and the lack of other alarm symptoms. The phrase actually starts with "And"? line 118 - revealed "an" instead of "a" and please cut was seen (use either one but not both)
