7041 Koll Center Parkway, Suite 160, Pleasanton, CA 94566, USA Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com https://www.wjgnet.com

Science Editor: The manuscript has been sent to peer-reviewers for re-reviewing. Company Editor-in-Chief: I have reviewed the Peer-Review Report, full text of the manuscript, and the relevant ethics documents, all of which have met the basic publishing requirements of the World Journal of Clinical Cases, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s) for its revision according to the Peer-Review Report, Editorial Office's comments and the Criteria for Manuscript Revision by Authors. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor. In order to respect and protect the author's intellectual property rights and prevent others from misappropriating figures without the author's authorization or abusing figures without indicating the source, we will indicate the author's copyright for figures originally generated by the author, and if the author has used a figure published elsewhere or that is copyrighted, the author needs to be authorized by the previous publisher or the copyright holder and/or indicate the reference source and copyrights. Please check and confirm whether the figures are original (i.e. generated de novo by the author(s) for this paper). If the picture is 'original', the author needs to add the following copyright information to the bottom right-hand side of the picture in PowerPoint (PPT): Copyright ©The Author(s) 2022. Authors are required to provide standard

|   | three-line tables, that is, only the top line, bottom line, and column  |     |
|---|---|-----|
|   | line are displayed, while other table lines are hidden. The contents    |     |
|   | of each cell in the table should conform to the editing specifications, |     |
|   | and the lines of each row or column of the table should be aligned.     |     |
|   | Do not use carriage returns or spaces to replace lines or vertical      |     |
|   | lines and do not segment cell content. Before final acceptance,         |     |
|   | when revising the manuscript, the author must supplement and            |     |
|   | improve the highlights of the latest cutting-edge research results,     |     |
|   | thereby further improving the content of the manuscript. To this        |     |
|   | end, authors are advised to apply a new tool, the RCA. RCA is an        |     |
|   |   |     |
|   | artificial intelligence technology-based open multidisciplinary         |     |
|   | citation analysis database. In it, upon obtaining search results from   |     |
|   | the keywords entered by the author, "Impact Index Per Article"          |     |
|   | under "Ranked by" should be selected to find the latest highlight       |     |
|   | articles, which can then be used to further improve an article under    |     |
|   | preparation/peer-review/revision. Please visit our RCA database         |     |
|   | for more information at:  |     |
|   | https://www.referencecitationanalysis.com/.                             |     |
| 3 | The fixed headings are copied.  | [Y] |
|   | The title concisely summarizes the main topic of the study and is       | [Y] |
|   | not too long (no more than 18 words). Words such as 'exploration',      |     |
| 4 | 'research', 'analysis', 'observation', and 'investigation' are avoided. |     |
|   | The title does not start with 'The' and does not include any Arabic     |     |
|   | numbers or uncommon abbreviations.                                      |     |
| 5 | A short running title is provided (no more than 6 words).               | [Y] |
|   |   |     |

| 6       The authors' full family (sur)names and full/abbreviated first names are listed on the title page and are consistent with those listed in the signed BPG Copyright License Agreement form.       [Y]         6       The 'Author contributions' passage describes the specific contribution(s) made by each author. The author's names are listed in the following format: full family (sur)name followed by abbreviated first and middles names.       [Y]         7       CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the research study; Wang CL, Zou CC, Hong F and Wu XM performed the research; Xue JZ and Lu JR contributed new reagents and analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and Wang CL, Liang L and Fu JF wrote the manuscript. All authors have read and approve the final manuscript."       [N] |  |

|   |  |
|   |  |
| 8 support and includes the corresponding identification number(s)   |  |
| and program ID(s) if available, and contains no spelling errors.  |  |
| The 'Corresponding author' passage provides the corresponding [Y]   |  |
| author's full first and family (sur)names, abbreviated title (e.g., MD,   |  |
| 9 PhD), affiliated institute's name and complete postal address   |  |
| (including zip code) and e-mail (written in all lowercase), and   |  |
| contains no spelling errors.  |  |
| The Manuscript Tracking information ( <i>i.e.</i> , Received, Peer review [Y]   |  |
| started, First decision, Revised, Accepted, Article in press, and   |  |
| 10 Published online) are provided along with the corresponding editor   |  |
| and date for each item, and contain no spelling errors.   |  |
| The Abstract section is formatted according to the article-specific       [Y]   |  |
| style (structured <i>vs</i> unstructured) and word count thresholds, as   |  |
| 11 follows:   |  |
| Commentary, Frontier, Diagnostic Advances, Medical Ethics,  |  |

|    | Minireview, Review, Therapeutics Advances, and Topic Highlight:                |     |
|----|--|-----|
|    | Non-structured abstract that is no less than 200 words.                        |     |
|    | Field of Vision, Case Report and Letter to the Editor:                         |     |
|    | Non-structured abstract that is no less than 150 words.                        |     |
|    | Research articles: Structured abstract with subsections for AIM (no            |     |
|    | more than 20 words); METHODS (no less than 80 words); RESULTS                  |     |
|    | (no less than 120 words); and CONCLUSION (no more than 26                      |     |
|    | words).  |     |
|    | The 'Key words' list provides 5-10 keywords that reflect the main              | [Y] |
| 12 | content of the study. The first letter of each keyword is capitalized,         |     |
|    | and each keyword is separated by a semicolon.                                  |     |
|    | The "citation" contains authors' names and manuscript title. The               | [Y] |
|    | name of the first author should be typed in bold letters; the family           |     |
|    | (sur) name of all authors should be typed with the first letter                |     |
|    | capitalized, followed by their abbreviated first and middle initials.          |     |
| 13 | For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick              |     |
|    | Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM,                |     |
|    | Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes                     |     |
|    | mellitus increases the risk of gastric cancer: A meta-analysis. <i>World J</i> |     |
|    | <i>Gastroenterol</i> 2019; In press  |     |
|    | The 'Core tip' provides a summary (less than 100 words) of the                 | [Y] |
|    | study that outlines the most innovative and important arguments                |     |
| 14 | and core contents of the paper and will serve to effectively attract           |     |
|    | readers.   |     |
|    |  |     |

| Γ  |   |     |
|----|---|-----|
|    | The 'INTRODUCTION' section clearly describes the relevant                                     | [Y] |
|    | background information for the study. Only the most relevant and                              |     |
|    | current (within the past 5 years) literature is cited, with the                               |     |
|    | exception of rare instances of seminal literature citations. All                              |     |
|    | technical terms and/or abbreviations are explained and/or defined,                            |     |
| 15 | with the full name of abbreviations given upon first appearance in                            |     |
| 15 | the text and the abbreviation presented in parentheses [i.e.,                                 |     |
|    | "computed tomography (CT)"]. First-person pronouns (e.g., 'I',                                |     |
|    | 'we') are used appropriately to clearly indicate the work performed                           |     |
|    | by the author(s). When weaknesses of previous studies are                                     |     |
|    | described in the text to highlight the innovations related to the                             |     |
|    | current study, the information is presented carefully.  |     |
|    | The 'MATERIALS AND METHODS' section clearly and accurately                                    | [Y] |
|    | describes all materials and methods used to obtain the data                                   |     |
| 16 | presented in the article and is adequate for a reader to repeat the                           |     |
|    | study.  |     |
|    | The 'RESULTS' section concisely describes the observational and                               | [Y] |
| 17 | experimental results. Representative data and data that have                                  |     |
|    | scientific significance are emphasized. Data is presented in either                           |     |
|    | the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is           |     |
|    | not repeated among each. Information presented in the tables and                              |     |
|    | figures clearly describes the trends, meaning, and inferences.                                |     |
|    | Results described in textual form are accurate, concise and clear.                            |     |
|    | Statistical symbols are accurate. Statistical significance is expressed                       | [Y] |
| 18 | as ${}^{a}P < 0.05$ , ${}^{b}P < 0.01$ ( $P > 0.05$ usually does not need to be denoted).     |     |
|    | If there are other series of <i>P</i> values, $cP < 0.05$ and $dP < 0.01$ are used,           |     |
|    | and a third series of <i>P</i> values is expressed as ${}^{e}P < 0.05$ and ${}^{f}P < 0.01$ . |     |
|    | Statistical data is expressed as mean $\pm$ SD or mean $\pm$ SE.                              |     |
|    | 1   |     |

| 19The 'DISCUSSION' section (1) describes the main purpose and<br>hypothesis of the study; (2) summarizes the most important results;<br>(3) illustrates and explains the results (but does not simply repeat<br>the data) and draws conclusions or inferences based on the results;<br>(4) points out the limitations of the study and their impact on the<br>results, as well as proposes further advice on future research<br>topic(s) or direction(s); and (5) describes the theoretical significance<br>and practical value of the findings.[Y]20The 'ACKNOWLEDGEMENTS' section expresses gratitude to any<br>individuals or organizations for technical support ( <i>i.e.</i> , providing<br>instrumentation, equipment or experimental materials, and/or<br>assistance in experimental work), non-technical services ( <i>i.e.</i> , useful<br>inspiration, suggestions, guidance, or review), and/or any other<br>auxiliary work.[N]21The 'ARTICLE HIGHLIGHTS' section provides comments for<br>original articles in accordance with the specified format.[Y]22The 'ARTICLE HIGHLIGHTS' section in the text, or citations<br>where the author's name is indicated in the text, a superscript<br>number should be placed following the name ( <i>i.e.</i> , "Pang et al"). For<br>citations where no author is indicated, a superscript number should<br>be placed at the end of the sentence. Respective examples are: "MalU<br>reported,", "Pan et al <sup>30,3</sup> ] moderate and exit for example, "The<br>experimental method used has been described in reference [8]." The<br>style of reference citations in tables is the same as that in the text<br>(e.g., Pan et al <sup>30,3</sup> ], please see reference [8]).  |    |   |         |
|--|----|---|---------|
| <ul> <li>(3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.</li> <li>The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (<i>i.e.</i>, providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (<i>i.e.</i>, useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.</li> <li>The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format.</li> <li>The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript number should be placed following the name (<i>i.e.</i>, "Pag <i>et al</i>"). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Ma<sup>[1]</sup> reported,", "Pan <i>et al</i><sup>[2]</sup> indicated"; "PCR has a high sensitivity<sup>[6]</sup>." No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text</li> </ul>  |    | The 'DISCUSSION' section (1) describes the main purpose and                           |         |
| 19       the data) and draws conclusions or inferences based on the results;       [Y]         19       the data) and draws conclusions or inferences based on the results;       [Y]         (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.       [Y]         20       The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support ( <i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services ( <i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.       [N]         21       The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format.       [Y]         style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript number should be placed following the name ( <i>i.e.</i> , "Pang et al"). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Ma <sup>10</sup> ]         22       be placed at the end of the sentence. Respective examples are: "Ma <sup>10</sup> ]         reported", "Pan et al <sup>D25</sup> ] indicated"; "PCR has a high sensitivity <sup>[69]</sup> ."
