### **SPECIFIC COMMENTS TO AUTHORS**

The authors presented a case of post-traumatic bulbous urethral stricture who was managed via interventional urethral balloon dilatation before EVIU. 1. There are several investigations and even review of the role of urethral balloon dilatation in post-traumatic bulbous urethral stricture. for example: <https://doi.org/10.1016/j.urology.2014.01.009>; <https://doi.org/10.1016/j.jvir.2015.08.006>. so I don't understand what is unique about your case and why it should be interesting for the readers of World Journal of Clinical Cases. 2. During the background of your abstract, it's not clear why your case is unique and important. 3. case presentation of your abstract is too long but lacks of important features, for example it's not important that 4. 4. during the present illness, you should also mention the the Character, Aggravating factors, Relieving factors, Timing and Severity of chief complaint.

### **SPECIFIC COMMENTS TO AUTHORS**

In discussion part, the authors should add one paragraph to introduce the etiology of urethral stricture including adults and adolescent. There are several stricture sites, therefore, authors should provide the detail.
