

## **Certification of language level**

To whom it may concern!

Hello. As a co-worker of Prof Chen in Beth Isreal Deaconess Hospital affiliated to Harvard Medical School, it is my pleasure to read and revise the article from Chen. Here I am pleased to state my points on his article and certify his language level owing to Chen's request. Prof Chen did excellent and systemic work on NGF/TrkA. His experiments can thoroughly and strongly support his points and conclusions. Regarding to language, his grammar and syntax are quite good. I think his language level is excellent and can be qualified with the level of your journal.

Thank you for your attention. Do not hesitate to contact me if you have further question. I really hope to hear good news from your journal.

Guoqi Zhang
